CAST YOUR VOTE

Sponsored Post

A Sponsored Post appears within the main content area of a web page or email, to easily capture your candidates' attention where they are already engaged.

Choose a Sponsored Post if you want to:

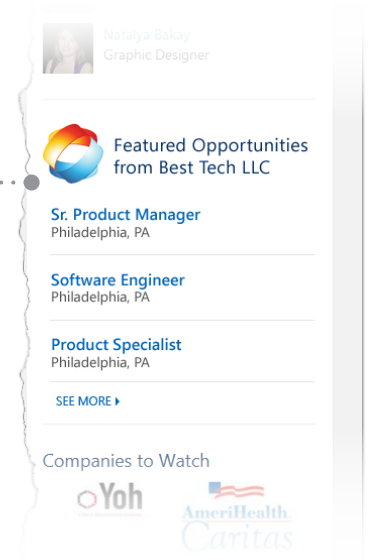

- Share content. Sponsored posts are great for creating brand engagement through white papers, articles and videos.
- Deliver relevant content to a targeted audience. Like all native advertising, sponsored posts work best when the offer or message is clearly tied to the surrounding content.

Featured Opportunities

This ad elevates your most important open positions by extending their reach beyond the main feed, and includes a link to see all of your current postings.

Choose Featured Opportunities if you want to:

- Increase exposure to key jobs. A perfect solution for hard-to-fill positions or high-priority openings.
- Create visibility for your hiring brand within a targeted professional audience.

Build a Custom Campaign

Targeted to your audience. Tailored to your goals.
